How To Get Started

1. Download the template pack.

Click the "Download Now" button on the first page of this document.
Login or signup for a Canva.com account (a free account is fine).

2. Add Your Logo & Picture

Once you have uploaded a headshot (your photo) and your company logo image file to Canva, Drag your image file over the placeholder picture or logo on each Instagram template. This will replace the placeholder image. To adjust the size within the frame, double-click on the image. Drag by a corner to adjust the size within the frame box.

3. Adjust Colours

You can easily replace or adjust any colours used on any image template.
Either select a colour object and choose a new colour or, if you have your brand colours already set up as a brand palette, just select your palette to change all coloured objects within each image.

4. Customize with your own preferred look.

Get creative (if you want). If you prefer to adjust the size of text, move items around or add additional elements, feel free to customize each post graphic as you like.

5. Export your finished Graphics

Once you have finished customizing the Instagram Post templates, click "download" on the top right of the screen. Ensure "PNG" is selected as the "file type" and choose "all pages" or only selected pages (images) that you wish to save. The images will be saved to your computer and you can now post to Instagram. Now relax and think about all the time you just saved with these easy-to-use templates.

Need Assistance?

We get it. Not everyone wants to spend hours creating graphics for social media...

If you would prefer to focus on your business rather than pretending to be a pro graphic designer, just give us a call. Our team would be happy to set up your monthly social media graphics for you! We'll keep you looking great and standing out with beautifully designed graphics so you stand out from your competitors.

Call me at 416-398-6669 or send an email to lowell@goingsocial.ca for more information.

Take Your Marketing To The Next Level

We Specialize in Facebook & Instagram Ads For Realtors

Are you looking for a profitable way to promote and sell properties faster, attract more leads & referrals, and reach more people?

Our marketing strategy, using Facebook & Instagram ads, has proven to help:

- Attract qualified leads
- Promote real estate listings to interested buyers
- Build a mailing list of interested buyers and sellers to continually connect with
- Increase followers to your social media accounts (Facebook & Instagram)
